

BECOME A MEMBER OF THE STAKEHOLDER ECOSYSTEM

The Stakeholder Ecosystem (SE) is a heterogeneous group of **stakeholders in the energy market** that have vested **interests in the demand response domain** and may be interested in the DRIMPAC solution. The SE will serve the purpose of an **Advisory Board** able to infuse the project with **novel ideas regarding new exploitation opportunities** and to ensure alignment of project outcomes with the expectations of the market stakeholders.

WHY DRIMPAC CAN BE INTERESTING FOR YOU?

The DRIMPAC solution will address innovative business models and service offering for **energy retailers** in order to facilitate their transformation from commodity suppliers to digital energy service suppliers.

ABOUT DRIMPAC

DRIMPAC offers a comprehensive solution to empower **CONSUMERS** to become **ACTIVE PARTICIPANTS IN THE ENERGY MARKET**. It comprises 3 main pillars:

(A) A framework which ensures interoperability and connectivity of existing systems and standards to avoid fragmentation and reduce the cost of DR solutions

(B) A human-centric, intelligent building energy management system

(C) Innovative business models and service offering for energy retailers to help them transforming into digital energy service suppliers
